Production profile - 26 August 2026

Who we are

One Click Service (OCS) is a Bangladesh-founded integrated digital service platform created to make complex service journeys easier to understand, access and manage. The platform connects users, agencies, service partners and verified institutions through structured digital workflows.

OCS serves individuals and organizations seeking travel, migration, jobs, education, medical, legal, financial, documentation and professional services. Users can discover services, prepare verified profiles and documents, submit requests and follow progress through secure workflows.

Platform role

OCS is a coordinating technology platform. Service availability, eligibility, timelines and outcomes depend on the selected service, the responsible provider and applicable authority requirements.

VISION	MISSION
Build a trusted Bangladesh-founded digital service ecosystem with international connectivity.	Simplify access to essential services through secure, transparent, technology-driven workflows with human support when guidance is needed.

Leadership

Mohammad Yousuf

Founder & CEO

Overall Vision, Strategy & Business Leadership

"We are building OCS around a simple responsibility: make essential service journeys clearer, safer and more accountable for every person we serve."

Leadership philosophy: lead with responsibility, build with transparency and keep the customer journey at the center of every decision.

Services around the journey

Published options and provider availability may vary. The categories below describe the service ecosystem supported by OCS and do not imply that every service or provider is available at all times.

Overseas Jobs / Recruitment	Visa & Migration	Student / Education Services
Air Ticket	Hotel Booking	Medical Services
Legal Assistance	Training	Document Attestation
Translation	Financial / Payment Services	Other OCS Services

Core values

Expert Team

Knowledgeable people and defined review paths.

Fast & Efficient

Clear digital steps that reduce avoidable friction.

Trust & Transparency

Visible requirements, status and accountability.

Global Standard

A future-ready platform designed for international journeys.

Customer First

Services organized around real customer needs.

Accountable by design

OCS applies layered controls across identity, access, sessions, transactions, documents and operational review. These controls are described at a high level and do not represent a security certification.

• Secure authentication	• KYC & identity verification
• Role-based access control	• Secure session management
• Protected payment and transaction workflows	• Data privacy controls
• Security monitoring	• Audit logging
• Secure document handling	• Implemented encryption and transport security controls

Organizational functions

Founder & CEO: Mohammad Yousuf. Executive functions: COO, CTO, CFO, CLO and CMO. These are organizational roles; unnamed functions do not imply that positions are currently occupied.

Operations; Technology; Finance & Accounts; Business Development; Marketing & Communication; Customer Support; Documentation & Processing; Partner & Vendor Management; Human Resource; Quality Assurance & Risk Management.

Partner ecosystem

Current platform capability includes structured partner onboarding, verification review and role-based service workflows. OCS is designed to expand responsible connectivity among users, recruiting and service agencies, employers, educational institutions, medical providers, legal professionals, travel providers and financial/payment providers. Category inclusion does not imply a current commercial integration or endorsement.

Bangladesh to an international service ecosystem
